SUMMARY

Full Stack Developer with 4+ years of experience building scalable enterprise applications using Angular, React, and modern web technologies. Experienced in designing interactive dashboards, REST APIs, and data-driven platforms using Node.js, FastAPI, and .NET Core. Strong expertise in performance optimization, reusable UI architecture, and leading engineering teams.

EDUCATION

Bachelor of Technology in Information Technology

2017 – 2021

IMS Engineering College, Ghaziabad

Marks: 7.2 CGPA

SKILLS

Frontend	Angular (Advanced), React, JavaScript, TypeScript, HTML5, CSS3
UI Libraries	Bootstrap, Tailwind CSS, Material UI (MUI), Angular Material
Backend	.NET Core, Node.js, Python (FastAPI), MySQL, MongoDB
Data Visualization	Chart.js, ApexCharts, ECharts
Tools	Git, GitHub, Bitbucket, Jira, JSON, jQuery

EXPERIENCE

Technology Lead Sep 2025 – Present HooLiv *Delhi, India*

- Leading the design and development of scalable enterprise applications using Angular, .NET Core, and Node.js.
- Architecting backend services and REST APIs with a primary focus on MongoDB for flexible and high-performance data management, while also integrating MySQL for relational data processing.
- Building interactive dashboards and analytics platforms using Chart.js and ApexCharts to provide real-time business insights and operational visibility.
- Mentoring developers, conducting code reviews, and establishing best practices for performance optimization, clean architecture, and scalable system design.

Project Engineer III (Project Lead) Sep 2024 – Sep 2025 Oges Solutions *Gurugram, Haryana, IN*

- Collaborated with clients to gather requirements and translate business needs into scalable technical solutions.
- Led the architecture and delivery of a **Project Cost Management Application** enabling real-time tracking of site, product, manpower, transportation, and equipment costs.
- Managed and mentored a 10-member engineering team across projects including **Flight Booking**, **Light Vehicle Management**, and **Equipment Validity Management**.
- Improved development workflows and resource utilization, accelerating project delivery timelines.

Project Engineer II Mar 2024 – Sep 2024 Oges Solutions *Gurugram, Haryana, IN*

- Developed a Fleet Management System for an oilfield services company with multi-level approval workflows and automated operational tracking.
- Designed data-driven dashboards illustrating the complete lifecycle of oil and gas operations from land exploration to market-ready products.

- Built interactive reporting dashboards using Chart.js and ApexCharts for planning, opportunity tracking, and operational insights.

Project Engineer Mar 2023 – Mar 2024 Oges Solutions Gurugram, Haryana, IN

- Integrated advanced charting libraries (Chart.js, ApexCharts) to visualize real-time production and inspection data.
- Developed reusable UI components and optimized frontend performance for improved responsiveness.
- Collaborated with backend teams to integrate REST APIs and troubleshoot data flow issues.
- Contributed to code reviews and implemented best practices to ensure maintainable and scalable code.

Software Engineer Mar 2022 – Mar 2023 Coforge Limited Noida, Uttar Pradesh, IN

- Developed a leave management portal enabling employees to apply, approve, reject, or withdraw leave requests.
- Implemented automated email notification workflows for approval and rejection processes.
- Generated employee-wise monthly summaries and reports for HR and management.
- Improved form validation and UX workflows, reducing support tickets by 30

PROJECTS

Enterprise Operations Finance Platform – HooLiv (Sep 2025 – Present) Designed and enhanced core enterprise modules for a product-based startup, including B2B invoicing, employee reimbursement, leave management, and collection MIS dashboards. Implemented payment link generation, automated workflows using cron jobs, and modernized legacy modules with improved UI/UX. Developed KPI-driven metric cards to provide real-time operational insights across multiple dashboards.

Tech Stack: Angular, .NET Core, Node.js, MongoDB, MySQL, Chart.js, ApexCharts.

Project Cost Management Application (PCMA) (Jun 2025 – Sep 2025) Leading the development of a cost management platform for an oil gas provider to track site, product, manpower, transportation, and equipment expenses through role-based workflows and real-time dashboards.

Tech Stack: Angular, FastAPI, MySQL.

Heavy Vehicle Management System (HVMS) (May 2024 – Mar 2025) Built a fleet management platform supporting multi-level approvals, automated vehicle assignment, inspection workflows, and complete trip lifecycle monitoring.

Tech Stack: Angular, Bootstrap, Tailwind CSS, Google Maps, Node.js, MySQL, ApexCharts, Chart.js.

Central Vigilance Commission (CVC) Dashboard (Jan 2024 – Apr 2024) Developed an analytics dashboard for monitoring the oil gas lifecycle, integrating multiple operational modules and delivering real-time insights through advanced data visualizations.

Tech Stack: Angular, .NET Core, MySQL, ApexCharts, Chart.js, ECharts, Plotly.js.

Well Services (Jul 2023 – Dec 2023) Created interactive dashboards for operational planning, opportunity tracking, and performance reporting with real-time visual analytics.

Tech Stack: React, Node.js, MySQL, Chart.js.
